Patient Care Mission

Any animal under our care will be treated with compassion as if it were one of our own. Every effort will be made to ensure your pet's needs are met while we provide a safe and trusted place for them to visit.

If your pet should become ill during their stay, it is our policy to treat them medically. Every effort will be made to notify you and provide an estimate for cost of care. However, immediate care will be provided without notification if necessary. An examination fee will not be charged. However, diagnostics, medications, and treatment fees will be charged when appropriate. If a patient becomes ill within 5 days of leaving our facility, we will provide an examination at no charge. Any diagnostics, medications, or treatment fees will be charged accordingly.

Personal Items Policy

It is our intention to provide an environment of comfort, as well as safety, for our boarding patients. We provide blankets, bedding, bowls, etc. that are easy to maintain, clean, and sterilize for all patients. We cannot accept items such as blankets, beds, or bowls that may be difficult to sanitize or could potentially get lost amidst the hundreds of items that go through our washing system.

If you choose to bring other items from home toys, bones, etc., they can be used for your pet. We will make every effort to protect your belongings and return them back to you at the end of your pet's stay. However, these items can be "misplaced" or may be returned in lesser condition than how they arrived. ***Please do not leave any items that cannot be easily replaced. FVMC cannot be responsible for personal items left.***
